Overview

NIBRS submissions for the state of Indiana no longer require direct communication with the agency and the FBI. Instead, there is one central point for the state to submit their NIBRS reports to the FBI. This process allows better and more centralized communication with the FBI rather than working through each agency individually. This process also allows agencies to use the state's NIBRS certification to submit their reports rather than force each agency to become certified independently.

This document describes how to submit the FBI's XML NIBRS Document to the state repository and how to modify the FBI's XML to include the required Indiana state data elements.

This document assumes that the reader can currently build to the FBI's 4.2 XML specifications.

Submissions

Submissions will be uploaded to the ARIES SFTP. To gain access and credentials to this SFTP, please email the ARIES support team at aries.support@lexisnexisrisk.com. Additionally, you may call the support team during business hours at 866-495-4206.

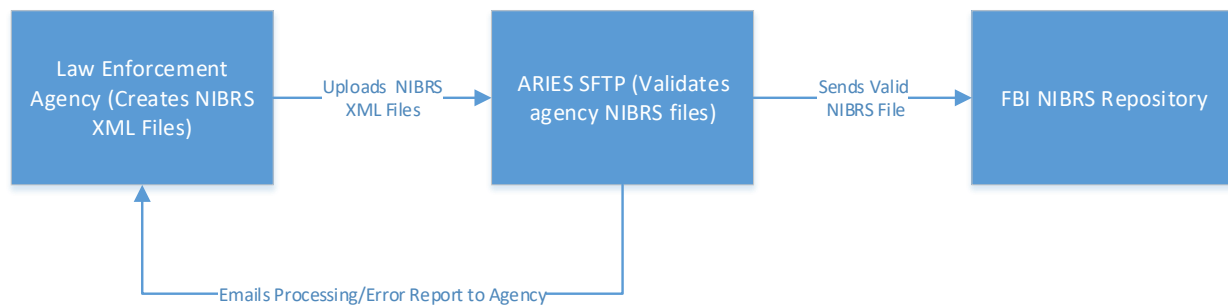

The names of the files should be in the form of the submitting agency or groups name followed by the date of submission. Examples: (Submitter)_MMDDYYYY or SamplePD_01152017.

NIBRS Error Reporting

NIBRS reports must meet the FBI requirements to be submitted. Only reports that are error-free will be sent to the FBI. Prior to the report being sent to the FBI, ARIES will validate the report and email an error report to your agency. These reports will be expected to be corrected and resubmitted.

If the error report lists warnings or reminders, the report will still go to the FBI. Only errors that would cause the FBI to reject the report will not be sent on.

Workflow

Additional State Data Elements

Indiana requires additional data elements to submit the NIBRS XML file. The information below includes information on how to add these data elements.

Data Element	Description	Valid Values	Required
OffenseCode	The Indiana offense code	See Appendix A	Yes
FelonyLevel	Describes the felony level	1-6	No
MisdemeanorClass	Describes the misdemeanor class	A,B,C	No
Counts	Indicates the total number of counts of the offense	1 -65,535	No
HouseNumber	Indicates the building number for the location of the offense	String: 1-20 characters	No
Street1	Indicates the street for the location of the offense	String: 1-40 characters	Yes
IntersectingRoadway	Indicates the nearest intersecting roadway of the offense	String: 1-40 characters	No
MilePoint	Indicates a mile point for the roadway	Decimal: Fraction Digits: 3 Values: 0 - 1000	No
CityName	Indicates the city for the location of the offense	String: 1-25 characters	Yes
Zip	Indicates the zip code for the location of the offense	String: 1-5 characters	No
CountyCode	Indicates the county in which the offense occurred	See Appendix B	No
Lat	Indicates the latitude for where the offense occurred	Decimal: Fraction Digits: 9 Values: -100 - 100	Yes
Long	Indicates the longitude for where the offense occurred	Decimal: Fraction Digits: 9 Values: -100 - 100	Yes

Schema and Additional Required Information

Additional downloadable documentation will be required to conform to the Indiana Extended NIBRS specifications. The IndianaExtendedNIBRS_IEPD_4_2_RC2_FINAL_20171214-1.zip is essentially the same as the NIBRS IEPD .zip that can be downloaded from the FBI's website. Only a few files have been changed or added. The documents can be obtained by going to the following link:

<https://pilot.ariesportal.com/Downloads/Download/Download?FileID=1&dirInfo=ISP%20NIBRS%20IEPD>

To get started, open one of the new files named ispnibrs_AllFields_Sample.xml. This sample was originally created by the FBI, but it was modified to include the Indiana offense and location data.

At the top of this sample document you'll notice the following two lines:

```
xmlns:ispnibrs="http://ariesportal.com/isp/isp-nibrs/1.0"
xmlns:ispcodes="http://ariesportal.com/isp/isp-nibrs-codes/1.0"
```

These two lines associate the prefixes ispnibrs and ispcodes with the two new Indiana specific namespaces. You will notice the ispnibrs prefix used in the sample with the new Indiana specific offense and location data. These namespaces help to avoid element name conflicts.

A little below that in ispnibrs_AllFields_Sample.xml you'll notice that the FBI xsi:SchemaLocation has been modified:

```
xsi:schemaLocation="http://fbi.gov/cjis/nibrs/4.2 ../base-xsd/nibrs/4.2/nibrs.xsd
http://ariesportal.com/isp/isp-nibrs/1.0 ../base-xsd/isp/1.0/isp-nibrs.xsd">
```

This associates the new ispnibrs namespace with the new Indiana specific XML schema that has been created and added to the FBI's IEPD. This is very helpful to have in place during creation of an XML incident file. XML editors pull in the information from the .xsd file and highlight where there are issues within the XML.

Arrest Subject Association

The state repository will link the arrestee to the subject. NIBRS already establishes a relationship between the arrestee and arrest; however, it does not establish this relationship between the arrestee and the subject. An additional Arrest/Subject Association will need to be added in this situation to establish this relationship.

Below is an example of how to establish this new relationship. A second ArrestSubjectAssociation node will be added as indicated in the highlighted section below.

```
<j:ArrestSubjectAssociation>
    <nc:Activity s:ref="Arrest1"/>
    <j:Subject s:ref="Arrestee1"/>
</j:ArrestSubjectAssociation>
<j:ArrestSubjectAssociation>
    <nc:Activity s:ref="Arrest1"/>
    <j:Subject s:ref="Subject1"/>
</j:ArrestSubjectAssociation>
```

XML Example

An XML example is provided below. Elements that reference changes from the FBI's file are highlighted.
